Tel (801) 468-3381
Fax (801-468-3296*

Dear Mr. Yocom:

We completed an audit of the District Attorney's Office, as requested, in conjunction with your recent election to that office. The scope of our audit included fixed and controlled assets, cash handling and payroll, and concerns relating to the Statewide Association of Public Attorneys (SWAP).

We also listed all personal computers (PCs), monitors, mouses and keyboards we could find at the 21st South and Sandy Attorney's offices and the Courtside Office Building, and also various other electronic and computer equipment. A listing of this equipment is included as Attachment A.

We found that employees in the Attorney's Office are generally conscientious about the security of County assets; however, accountability of the assets can be improved.

FIXED AND CONTROLLED ASSETS

Our findings in this area are:

- C Computer equipment should be tracked using a numbered tag system.
- C Some fixed assets need to be located.
- C The optical imaging system can be disposed of.
- C Special emphasis should be given to tracking notebook computers.
- C There may be a conflict of interest with respect to building/maintaining computers in the Attorney's Office.

Computer equipment should be tracked using a numbered tag system. Several PCs did not have an identifying number attached to them, either a serial number or a county identification tag. Out of 251 Attorney's Office PCs we identified and listed, 28 (11 percent) had no identifying number attached. The PCs assembled by Attorney's Office computer specialists from component parts, including generic outer cases, did not have serial numbers. Also, a few brand-name PCs did not have serial numbers.

Each office is responsible for listing and tracking its own computer equipment costing less than the current capitalization threshold of \$3,000. The County no longer tags most PCs since they can be purchased for less than that amount. Countywide Policy 1125, *Safeguarding Property/Assets*, requires individual offices to keep track of these "controlled" assets or assets with a cost of \$100 or greater which "are sensitive to conversion to personal use." Your staff has already discussed with us a contemplated bar code label and scanner system to keep track of computer equipment. We commend this action.

RECOMMENDATION:

We recommend that the Attorney's Office tag all PCs with a unique identifier number and also any other "controlled" assets as deemed appropriate.

Some fixed assets need to be located. We could not find 15 out of 93 Attorney's Office fixed assets from the County fixed assets list. Nine of these are from the Civil Division; six are from the Justice Division. The following is a list of fixed assets, showing the County tag number, that we could not find:

1. 56602 IBM Typewriter
2. 84240 Wang Power Conditioner
3. 87764 Wang Laser Printer LDP8111D
4. 88201 Giga Trend Tape Backup System
5. 88397 Seaview LAN Pack
6. 89540 NMC PC 486 EISA
7. 92222 Optical imaging Software
8. 92223 Optical imaging Software
9. 98981 NMC PC W/8 RAM, Pentium 75
10. 85047 Houston Instruments PC Plotter
11. 88253 Informer non-audio
12. 93596 Mita copier
13. 93819 Kardex Lateral Lektriever W/12'

David Yocom
April 16, 1999
Page 3

14. 94477 Toshiba PC 400CDT, Notebook computer
15. 95365 HP LaserJet 5Si MX

We received verbal reports regarding some of these fixed assets. Item 10, the PC plotter, was purportedly transferred to the Sheriff's Office "about four years ago," but we found no paperwork to support this. Item 11, the non-audio informer was sent to California for repair in March 1998 and has been there ever since. The Mita copier, item 12, was said to be in continual poor working order; the service dealer took it away and has had it in custody for several months.

The 12' Lektriever, item 13, is purportedly at 21st South, but both Lektriever there are numbered differently from the one in question. The fixed assets report lists seven Lektriever; we counted eight, found tags on five, and assumed the identity on one for which the tag was not attached or visible. One of the Lektriever is a recent purchase, is not tagged, and is not on the fixed assets list. See Attachment B for additional detail.

Various items on the fixed assets report, including three copiers, do not have county tags attached. In spite of this, we positively identified these items on the fixed assets report. Again, see Attachment A for detail.

The offices at the Courthouse Office Building are not numbered, making the identity of fixed and controlled assets by location difficult to achieve. Visible numbers on each office would create a much more efficient fixed and controlled asset management system. People change offices, but the numbers can remain the same.

RECOMMENDATIONS:

1. *We recommend that the District Attorney's Office locate and account for missing fixed assets and prepare a letter to the Board of County Commissioners requesting that unlocatable fixed assets be deleted from the official County list.*
2. *We recommend that County identification tags be attached to all fixed assets.*
3. *We recommend that visible office numbers be placed at the Courthouse Office Building.*

The optical imaging system can be disposed of. The Attorney's Office invested in optical imaging equipment and software that is not being used. We found two scanners still in boxes that were purchased over two years ago at \$19,000 each. In addition, the Attorney's Office spent over \$25,000 for optical imaging software, items 7 and 8 on the missing fixed assets list above.

This system does not meet Attorneys' needs, is not being used, and should therefore be disposed of unless an adequate solution can be found to make it suitable.

RECOMMENDATION:

We recommend that the optical scanning system be disposed of barring any adaptation that would suit it to the needs of the District Attorney's Office.

Special emphasis should be given to tracking notebook computers. Control of notebook, or laptop computers is particularly important since these items are easily stolen. Recent press reports have focused on the susceptibility of laptops to theft and the ensuing loss to business.

Laptops now can be purchased for just under \$3,000, making them valuable but not costly enough to be listed on the fixed assets report. Item 14 on the missing fixed assets list above is a laptop computer (serial number 12519241).

As part of our work, we also looked at a sample of Attorney's purchases over the last two years and found a Toshiba laptop computer, serial number 78882756A, purchased in 1998, that we did not identify in our listing of computer equipment. Of course, it could have been in someone's desk drawer or out in the field at the time we passed through the offices, but it points to the need for reliable accountability. One other laptop that was also part of this same purchase order did in fact appear on our computer equipment list.

RECOMMENDATION:

We recommend that the District Attorney's Office identify all laptop computers and include these in their controlled assets data base.

There may be a conflict of interest with respect to building/maintaining computers in the Attorney's Office. The Attorney's Office assembles some of its PCs in-house from off-the-shelf components or from computer-cannibalized parts. Adequate control over computer parts is important since they can easily be sold for personal gain.

Countywide Personnel Policies and Procedures #5650, *Professional Ethics and Conflict of Interest*, requires disclosure of employment in a business that is regulated by the County. Knowledge of which employees might have computer business interests can help reduce the risk of missing computer parts or the risk that an employee could otherwise contract for services with the County.

RECOMMENDATION:

We recommend that the Attorney's Office review with employees Countywide Policy 5650, Professional Ethics and Conflict of Interest, emphasizing computer-related business interests.

SWAP

We reviewed SWAP records and spoke with District Attorney personnel to obtain an understanding of the affiliation between SWAP, Salt Lake County, and the District Attorney's Office. We also reviewed internal controls and examined cash records. Specific recommendations and details of the findings are summarized below:

- C The District Attorney's office is paying a disproportionate share of SWAP administration costs.
- C One individual receives and records cash for SWAP.
- C Some expenditures are not adequately documented.
- C An annual presentation of actual revenues and expenditures compared to budget would be a useful management tool.

The District Attorney's office is paying a disproportionate share of SWAP administration costs. Five Salt Lake County employees spend time on tasks involved with SWAP. In addition, the County provides office space, equipment, and supplies for SWAP to operate. The \$24,000 paid to Salt Lake County does not cover all of the County's costs to manage SWAP.

Member entities of SWAP should bear a proportionate share of costs for administration and management of SWAP. In 1998 the County spent approximately \$195,000 on salary and benefits for County employees for time devoted to SWAP-related tasks. This amount does not include dues paid for County attorneys to participate in SWAP or other administration costs.

Salt Lake County is providing a large subsidy to SWAP. Consideration should be given to revamping the dues structure so that member organizations may pay a proportionate share of SWAP operating costs. Also, we suggest that management responsibilities rotate between larger member entities, such as the Attorney General, every 3 to 5 years.

RECOMMENDATIONS:

1. *We recommend that the dues structure be revamped so that member organizations pay a proportionate share of SWAP operating costs.*
2. *We recommend that larger member entities rotate management responsibilities of SWAP.*

One individual receives and records cash for SWAP. The accountant who does bookkeeping for the SWAP account bills organizations for annual dues, receives payments in the mail, deposits the payments in the SWAP bank account, and records payment. This arrangement is not consistent with generally accepted internal control practices. One solution would be to separate responsibility for receiving and recording payments. When responsibility for receiving and recording cash is not separated, the possibility exists that funds could be diverted to personal use.

The bookkeeping for SWAP does not take much time. Because of the minimum amount of work needed to be done, only one individual has been involved in the process in the past. However, internal controls over dues payments could be improved by having the receptionist record checks on a log as they are received prior to being deposited.

RECOMMENDATIONS:

1. *We recommend that the receptionist prepare a check log when the mail is opened.*
2. *We recommend that the Executive Director periodically review SWAP financial records for completeness.*

Some expenditures are not adequately documented. When we examined the back-up for a sample of checks written out of the SWAP account, we found some training and travel expenditures that did not have back-up attached to the duplicate copy of the checks. The expenditures were for travel to St. George and for a firearm training consultant.

The SWAP Management Agreement with Salt Lake County states, "Records sufficient to support such expenditures shall be maintained by COUNTY and made available for review..." Since back-up is not available for these expenditures, the SWAP Board cannot review exactly what funds were spent on. The Executive Director of SWAP was not aware that some of the checks did not have adequate back-up. An oral agreement was made with the firearm training consultant to establish how

much he would be paid for each training session. However, a receipt was not generated for SWAP records.

By providing adequate back-up for each check, the SWAP Board of Directors and others interested in specific expenditures can examine the supporting detail of each transaction.

RECOMMENDATION:

We recommend that supporting documentation be obtained for each SWAP expenditure.

A presentation of actual revenue and expenditure compared to budget would be a useful management tool. Currently, an annual budget is supposed to be presented to the SWAP Board of Directors once a year according to the Management Contract. A presentation of actual revenue and expenditures compared to budget is not required but should be useful information for the Board.

Presentation of an annual budget to a Board of Directors is common practice in business organizations. In addition to an annual budget, a presentation of budget compared to actual revenues and expenditures would assist the Board of Directors in evaluating the effectiveness of dues collections and reasonableness of expenditures. This practice would also be useful in preparing future budgets and determining if corrective action is needed to address problems identified (i.e. cost overruns, etc.).

The presentation of a budget and financial statements will allow all parties involved in SWAP to be aware of how funds are being used.

RECOMMENDATION:

We recommend that the Executive Director of SWAP present a financial report that includes a balance sheet and Statement of Expenditures, compared to actual, to the SWAP Board of Directors. This information should also be available to individual members of SWAP.

ASSET FORFEITURE

Two types of fees are collected in the asset forfeiture area. The first fee is a 15 percent charge collected by the District Attorney's Office for court filing fees. The District Attorney also is reimbursed for publication costs by police entities. The District Attorney files cases in Third District Court for assets seized by police entities throughout Salt Lake County. The Court determines if the police entity

had probable cause in seizing the asset. If there is probable cause, the forfeiture is awarded to the police entity. The police entity then pays the County Attorney 15 percent of any assets seized. For example, if \$1,000.00 is seized by Murray City, and the forfeiture is awarded to Murray City by the Court, then Murray City owes the County Attorney \$150.00 for court filing fees.

The second fee originates from asset forfeiture cases in which the Attorney's Office Special Investigations Major Felony Unit (SIMFU) and Salt Lake County Sheriff are involved. Any assets forfeited in these cases are shared between the two offices. After the 15 percent court filing fee is subtracted, SIMFU receives 40 percent of the seized asset and the Sheriff's Office receives 60 percent of the seized asset. For example, if \$1,000.00 is seized on a case, \$150.00 goes to the Attorney's Office for court filing fees, \$340.00 goes to SIMFU, and \$510.00 goes to the Sheriff's Office.

Our findings relative to asset forfeiture collections are as follows:

- C A system for tracking and aging unpaid legal fees is needed.
- C The Sheriff's Office is not being billed for legal fees in a timely matter .
- C One individual receives cash and records payments.

A system for tracking and aging unpaid legal fees is needed. The deputy district attorney responsible for collection of court fees on asset forfeiture cases does not track receivables to determine if amounts due are paid in a timely manner. Also, some case files are placed in the closed-file area before total payment has been received.

In this area the court filing fees are considered a receivable. Currently, if management wanted to determine which court fees are 30 days past due, every single file would have to be examined. There isn't a way in the current system to do an aging of receivables.

In addition, when case files are put in the closed-file status after the first payment is received, management cannot keep track of when the next payment is due. Funds owed may never be collected since no one is keeping track of when payments should be received. If another payment happens to be made, the file is pulled and the amount is credited to that case number.

By tracking and aging receivables, via a "receivables system," amounts owed can be collected in a more timely manner. The deputy district attorney can send out past due letters to those entities who are not paying on time. Management will be able to know exactly how much is owed at a point in time and to what extent amounts are overdue.

RECOMMENDATIONS:

1. *We recommend the District Attorney's Office develop a system of tracking and aging unpaid legal fees.*
2. *We recommend case files in which a partial payment have been received not be placed in the closed file until the total amount due is remitted.*

The Sheriff's Office is not being billed for legal fees in a timely matter. SIMFU has not received some funds due to them from the Sheriff's Office for asset forfeiture cases in which both organizations were involved. The particular cases in which funds have not been received include: Case #95-163355, amount owed \$107.10; and Case #96-170244, amount owed \$19,166.30.

Since funds owed to SIMFU have not been transferred by the Sheriff's Office, funds available to SIMFU for operations are reduced. The District Attorney has not been notifying the Sheriff's fiscal division of all cases that are criminal investigations that involve both SIMFU and the Sheriff's Office.

ACTION TAKEN:

The District Attorney is now billing the Sheriff's Office for the 40 percent owed to them for shared asset forfeitures at the same time the Attorney bills for court filing fees and other legal fees.

One individual receives cash and records payments. The deputy district attorney responsible for filing asset forfeiture cases performs many of the accounting functions for this area. The attorney bills police entities for the court fee, receives checks in the mail for payments, and records the payments received in the accounting system.

Separation of duties for receiving and recording payments received is a necessary control. If separation of duties is not present for receiving and recording cash, the possibility exists that funds could be diverted to personal use.

Since the mail received by the deputy district attorney is highly classified, no one else in his office can open the mail addressed to him. However, separation of duties can be established by requiring police agencies to send their payment directly to the accountant.

ACTION TAKEN:

The deputy district attorney has changed the letter he sends to police entities billing the amount owed to

the District Attorney. The letter now states to send payments directly to Dick Barton in accounting. Once payment is received by Dick Barton, the deputy district attorney is notified so payment can be recorded.

CASH

We examined the cash accounts listed under Attorney, District Attorney, and Government Immunity sections of the Petty Cash Report prepared by the Accounting and Operations Division. We did not examine the garnishment account. This account was examined in 1998 and an audit report was released at that time with our recommendations. Specific findings and recommendations follow:

- C State policy requires unclaimed property to be transferred to the deputy state treasurer.
- C Law Library cash receipts were disposed of prematurely.

Unclaimed property has not been transferred to the State of Utah. Uncashed checks dating back to 1992 appear on the bank reconciliation for the County Claims Account managed by the Attorney's Office. The amount of uncashed checks over a year old total approximately \$1,100.00. A majority of these checks are for witness fees in the amount of \$17 each.

The Utah State Code requires any tangible property held by the County that remains unclaimed for more than one year to be transferred to the State of Utah. (Utah State Code 67-4a-210, 67-4a-310)

RECOMMENDATION:

We recommend that the District Attorney's fiscal staff contact payees on uncashed checks over one year old. If the payee cannot be contacted, then the appropriate actions need to be taken to transfer the funds to the deputy state treasurer.

Law Library cash reports were disposed of prematurely. Duplicates of 1998 daily cash reports for the Law Library were disposed of by the Library Clerk once the Law Library was closed to the public at the end of January 1999. The clerk was not aware of the record retention policy.

The manual released by the State of Utah entitled Utah County General Record Retention Schedule 1996, Schedule 5, item 5-9, requires records of daily cash reports be retained for three years and then destroyed. Duplicate copies of the original record should be maintained for one year and then destroyed.

David Yocom
April 16, 1999
Page 11

The clerk did send originals of the cash receipt report to the accountant who due bills the revenue. However, the duplicates of the original were destroyed and verification that all funds collected in the Law Library were deposited into a County account is not possible. There is no way of verifying that the accountant who due bills the revenue received all the original forms and cash to deposit since there is not any duplicate copies to compare the originals to.

RECOMMENDATION:

We recommend that cash reports be retained in accordance with the County General Record Retention Schedule.

We extend our appreciation to you and member of your staff who assisted us with the audit. If you have questions or would like to discuss our findings and recommendations in greater detail, my audit staff would be pleased to meet with you at your convenience.

Sincerely,

David L. Beck
Chief Deputy

Lektrievers from the 0801 Fixed Assets List

	County Tag #	Size	Location where found
1	82824	8'	4th So - 3rd Floor
2	82825	8'	4th So - 3rd Floor
3	85149	10'	21st So-S3020
4	93817	8'	4th So - Basement *
5	93818	10'	4th So - 3rd Fl
6	93819	12'	NOT FOUND
7	96802	not shown	21st So-S3020

* - No county tags on the Lektrievers in the basement. There were actually two Lektrievers in the basement. Marked off one anyway as located because the fixed assets list reported one as being in the basement.

Total Lektrievers the auditor viewed:

Courtside - 3rd Floor	4
Courtside - Basement	2
21st South	<u>2</u>
 TOTAL Lektrievers	 8

Fixed assets the auditor marked as located but no county fixed asset tag is attached:

Item	Make	County Tag Number	Location
1 Copier	Canon NP6050	94605	Courtside-Basement
