Ben McAdams, Mayor Salt Lake County 2001 S State St #N2100 Salt Lake City, UT 84114-4575

Re: An Audit of the Key Controls of Riverton Library

Dear Mayor McAdams:

We recently completed an analysis of the financial records of Riverton Library in compliance with Utah Code Ann. § 17-19a-204. Our purpose was to verify the accuracy and completeness of selected financial records and to assess compliance with certain internal controls that we have identified as key to good financial management. We also sought to identify areas of material risk to determine whether we should commit more of our limited resources in further auditing or investigation. A report of our findings and recommendations is attached.

Our work was designed to provide reasonable but not absolute assurance that records were accurate and complete and that the system of internal controls was adequate. There may be inaccurate or incomplete financial records that were not selected for review. Further, there may also be instances of noncompliance in areas not examined.

We appreciate the time spent by the staff at Riverton Library and the cooperation from Christa Warren, Riverton Library Manager, Karen Shuring, Circulation Supervisor, Kristin Allred, Assistant Circulation Supervisor, and other assigned staff members for answering our questions, gathering the necessary documents and records, and allowing us access to Riverton Library during our audit. The staff was friendly, courteous, and very helpful. We trust that the implementation of the recommendations will provide for more efficient operations and better safeguarded County assets. Please feel free to contact me with any questions.

Sincerely,

Gregory P. Hawkins Salt Lake County Auditor

Insto C. Kasal

By Anita C. Kasal Deputy Auditor

cc: Jim Cooper, Library Director Javaid M. Lal, Administrative and Fiscal Manager Christa Warren, Riverton Library Manager

Objectives

Pursuant to § 17-19a-204, we analyzed the financial records and internal controls of Riverton Library. Our purpose was to verify the accuracy and completeness of selected financial records and to assess compliance with certain internal controls that are key to good financial management. We also sought to identify areas of material risk.

Conclusion

Riverton Library has put into place key internal controls for managing public funds, safeguarding public assets, and payroll reporting. Most risks identified were minor and would not be expected to result in the material loss of County assets. Deficiencies in certain internal controls over the change fund and cash receipting procedures have a higher likelihood of leading to a loss of County property.

Findings, Recommendations, and Management Responses

Finding # 1 - Accountability of cash outages could not be identified to individual cashiers.

Risk Level: Moderate

Countywide Policy #1062 "Management of Public Funds," Section 5.3.1 states:

"All overages and shortages, regardless of the amount, should be recorded daily by each Cashier on MPF Form 11, Cash Over/Short Log. When a significant shortage or a pattern of shortages occurs in the accounts of any Cashier, Agency Management shall conduct an investigation of the circumstances and report their findings to the Auditor's office. This reporting can be accomplished informally by email."

The Riverton Library cashiers did not balance their cash drawers when changing shifts. Accountability of cash outages could not be identified to individuals.

When cash overages and shortages are not reported by each individual cashier, then Agency Management will not be able to determine when a significant pattern of shortages occurs for a cashier.

Recommendation

We recommend that each cashier record daily any overages or shortages on MPF Form 11.

Management Response

Due to low monetary value of transactions, Riverton Library staff and Library Fiscal department staff reviews all shortages and overage in aggregate on daily basis. All outages over \$2 are reviewed and investigated to identify patterns. It would not be cost-effective for the library to assign a dedicated cashier to each cash register. The Library staff is cross-trained in different areas of library operations to better utilize their time and to provide better customer service.

Finding # 2 - The key to the lock box was not secured leaving the keys to cashier drawers, copiers, and EnvisionWare machine more accessible.

Risk Level: Moderate

Standard business practice requires safeguards over keys to change funds.

The key to the lock box containing the keys to cashier drawers and machines was left in the keyhole, thus the box was not locked and secured.

When the safeguards to funds (lockable deterients) are not properly used, the funds are at a greater risk of being lost, stolen, or diverted for personal use.

Recommendation

We recommend that Riverton Library management safeguard keys contained in the lock box, by locking the lock box and removing its key.

Management Response

Riverton Library will secure its lockbox that contains keys to cashier drawer, copier, and EnvisionWare coin box.

Finding # 3 - The Daily Cash Collections Form lacked a supervisory signature as evidence of review.

Risk Level: Low

Countywide Policy #1062 "Management of Public Funds," Section 4.2.2 states:

"The "master" balance sheet shall be reviewed and reconciled to the bank deposit slip, and signed by another employee designated by Agency Management; and if possible, by an individual with equal or higher authority than the individual who prepared the deposit."

A cashier prepared the deposit creating the Daily Cash Collections Form (master balance sheet); a person of equal or higher authority was not documenting a review and reconciliation to the Agency receipt (alternative bank deposit slip), on that form.

When a cashier is also the deposit preparer, and no review or reconciliation is documented by a person of equal or higher authority, funds are at a greater risk of being lost, stolen, or diverted for personal use.

Recommendation

We recommend that Riverton Library review and reconcile Agency receipt with the Daily Cash Collections Form and document the review happened.

Management Response

To comply with the Policy # 1062, Library Fiscal department staff reviews daily deposit sheet with the bank deposit slip for accuracy. Library Fiscal Coordinator performs an off-site review of the deposits. The Coordinator receives a copy of the balance sheet (Daily Cash Collection Form) and bank deposit slip along with deposits in a tamper-proof bag. A master deposit is prepared after the review and a receipt confirmation is sent to Riverton Library staff preparing the deposit.

Finding # 4 - Access to the area housing the safe was not locked during non-business hours.

Risk Level: Low

Standard business practice requires lockable access to the area housing the safe. The access should be locked during non-business hours.

In June 2012, funds were stolen from the safe because the area housing the safe was not locked and the safe was not secured by spin off of the combination.

When safeguards to funds (lockable deterrents) are not properly used, funds are at greater risk of being lost, stolen, or diverted for personal use.

Recommendation

We recommend that Riverton Library management lock access to the area housing the safe.

Management Response

Riverton Library is currently securing the area housing the safe. The safe itself is secured at all times.

Finding # 5 - No comprehensive software inventory was on file.

Risk Level: Low

Countywide Policy #1400-3 "Information Technology Security Policy: Software Licensing Policy," Section 3.5 states:

"County agency management shall maintain a current software inventory which includes at least the following: number of authorized and actual installations, license agreement, and proof of purchase. County agency management shall conduct an annual review of their software inventory. Software inventories shall be updated whenever new software is acquired and/or installed or software is uninstalled, or the IT resource and/or system is transferred, decommissioned or sent to surplus."

Salt Lake County Library Agency management did not completed a software inventory.

When a software inventory is not maintained, there is an increased risk of unlicensed software on computers, which could result in fines and penalties. In addition, available software licenses may not be fully utilized.

Recommendation

We recommend that Salt Lake County Library Agency management maintain a completed software inventory.

Management Response

The Library Technology department maintains an inventory of authorized installations, license agreements, and proof of purchase. The number of actual installation project is underway in 2013 using KACE inventory tracking system. The Library also plans to install Windows 7 on all library computers with improved ability to restrict software installation on library computers.

Finding # 6 - An SAQ representing Library Agency's compliance with PCI had not been completed and was not on file.

Risk Level: Low

Countywide Policy #1400-7 "Payment Card Industry Data Security Standard Policy," Section 3.0 states:

"Any County agency that accepts, processes, transmits or stores cardholder data using any County IT Resource or system shall comply with the Payment Card Industry Data Security Standard (PCI-DSS) in its entirety."

An SAQ representing Library Agency's compliance with PCI had not been completed and was not on file.

Not completing this self-evaluating questionnaire for PCI/FSS increases the risk of fines and an inability of accepting credit cards as payments.

Recommendation

We recommend that Library Agency management complete and sign an annual SAQ and that Riverton Library keep a copy of the SAQ on file to show they are aware of and compliant with PCI requirements.

Management Response

Salt Lake County Library is currently working on a system-wide PCI compliance process. A most recent SAQ-C questionnaire was provided to the audit team. The Library is currently at 78% completion on SAQ-C certificate based on scanning data from a third party PCI scanning service. A plan is in place to complete Level-C compliance in 2013.

Additional Information

Background

The Riverton Library is located at 12860 South Redwood Road, Riverton, Utah. The mission of Salt Lake County Library Services is to make a positive difference in the lives of customers by responsively providing materials, information, and services at community libraries located throughout the Salt Lake Valley. In early 1939, the Salt Lake County Library opened in two rooms of the old Midvale School. Today over 70% of area residents hold a library card. To serve the needs of a growing and diverse population, Salt Lake County operates 19 libraries and two reading rooms. Advancements in library technology has allowed express check-in at several locations, self-checkout at all libraries, and access to the world of electronic information through a new library website.

Scope

Our work included a formal examination of financial records related to the following key internal controls, to the degree applicable:

- Change fund
- Petty Cash and Imprest Accounts
- Cash Receipting
- Cash Depositing
- Credit / Debit Card
- Capital and Controlled Assets and Software Inventory
- Financial Computer Controls
- Purchasing Card Use
- Payroll Practices

Our examination period covered up to twelve months ending January 31, 2013. In addition to reviewing financial records, we reviewed and examined current practices through observation. Sampling of daily cash deposits, where applicable, was performed to assess compliance with Countywide policy and standard business and internal control practices.
